DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim 12, drawn to an in-vehicle electronic device, classified in class 702, subclass 32.
- II. Claim 16, drawn to a thermal flowmeter, classified in class 73, subclass 202.5.
- III. Claim 17, drawn to an electronic circuit board, classified in class 361, subclass 720.

The inventions are distinct, each from the other because of the following reasons:

Inventions of each of groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions can each be used for their respective uses for example a thermal flowmeter and an electronic circuit board could have separate utility. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group II is not required for Group III, and Group I is not required for Group III restriction for examination purposes as indicated is proper.

Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 2863
